

Business Architecture Training

Learn to apply key business architecture techniques

Develop the ability to use Business Architecture (BA) techniques. Understand the purpose and value of BA. Know the different models and their value for the accountability of BA decisions. Hands-on training with Business Model Canvas, Target Operating Model choices, Business Capabilities, and roadmapping. Gain deep insights into how to model an organization through Capabilities, and how to move towards the target business architecture by increasing your capabilities in incremental steps.

Training days

Every training day starts at 9 AM and ends at 1 PM (Brussels Time). For this training, the self-paced learning period starts two weeks earlier on September 22nd. The training days for this course are:
