

Architectural Tools and Processes Training

Build strong architectural foundations into your organization

Deep-dive into the four main areas of the architecture process: visualization, strategy definition, strategy execution, and delivery preparation. Learn and develop techniques and best practices in each of these areas.

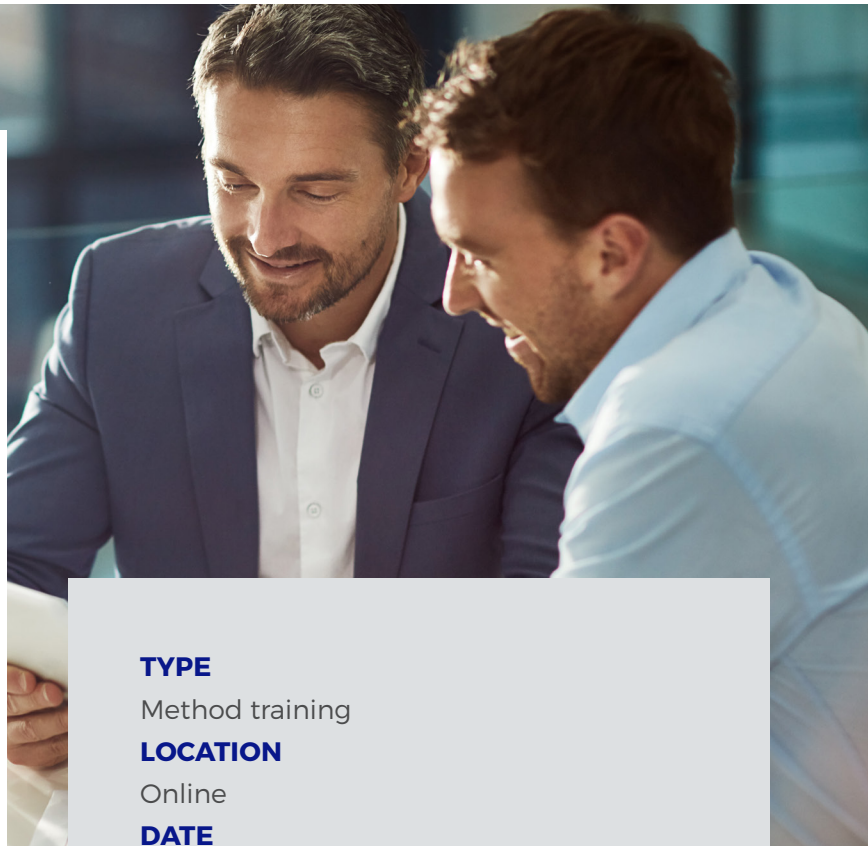

Reflect on interactions with key stakeholders, and discover how to embed the associated tools and modeling approach in your organization.

Get up to speed with ArchiMate modeling. Extend your toolbox by applying cases that represent the modeling complexity.

Training days

Training days always start at 9 AM and end at 1 PM (Brussels time). The self-paced learning period starts two weeks earlier on October 20th. The dates for this course are:

- Wednesday, November 3rd
- Wednesday, November 10th
- Monday, November 15th
- Thursday, November 25th

TYPE

Method training

LOCATION

Online

DATE

November 2021

DURATION

3 days

INTERESTING FOR

Enterprise Architects, Domain Architects and Solution Architects with hands-on experience in this role.

LEARNING OBJECTIVES

- Apply architectural modeling techniques using freely available ArchiMate tooling;
- Learn how to align with stakeholders to gather concerns and content, and communicate through architectural models;
