

XPLUS CxO-as-a-Service

Every organization needs a CTO or CIO,
whatever its size

To make the most of your IT investments, you need someone in charge of your technology strategy. XPLUS CxO-as-a-service lets you add CIO or CTO expertise to your team flexibly to do just that. The CIO will help you achieve your goals by managing IT staff, vendors, budgets and assets, and designing processes and standards. They will also be responsible for sourcing and procurement, and can provide insights specific to your business as well as enhancing application-specific knowledge. The CIO also represents the organization's technological interests and innovation at the executive and board level.

What is XPLUS CxO-as-a-Service?

CxO-as-a-Service gives you a strategic IT business partner whenever you need one. It can be short or long term, part or full time. This exclusive XPLUS service brings digital transformation, mergers and acquisitions, agile organization transformation and IT balance sheet rationalization within reach of any organization.

Here are some examples of CxOs you can hire through our service:

The outsourced CIO / CTO

- An outsourced CIO / CTO develops a strategic plan and IT roadmap to guide your future technological initiatives;
- This CIO / CTO focuses on software applications that solve business needs while ensuring optimum network performance, security, and scalability of your tools;
- Hiring an outsourced CIO / CTO can lead to significant savings on your staffing costs. You can eliminate the need for a salary, benefits, bonuses, and other perks necessary to attract and retain someone in-house, while still providing direction for your IT department, controlling costs, and increasing efficiency.

The turnaround CIO / CTO

- A Turnaround CIO / CTO leads a clear, personalized, digital transformation process;
- This type of CIO / CTO reinforces the value of IT, initiates positive and impactful change within your organization through solid project management, and boosts employee engagement through collaboration and communication;
- By focusing on vision, planning, and performance, a Turnaround CIO / CTO helps your company evolve its culture, processes, and leadership.

The interim CIO

- Our interim CIOs quickly assess your situation. They collaborate with your management team to implement immediate solutions and plan a long-term IT strategy;
- When it's time to hire a permanent CIO, we help to ensure your new hire is a perfect match for your organization.

Moving forwards, CIOs will need to adapt their skills and expertise in three ways. Firstly, they need more than just technological expertise. Secondly, they need to understand how to shift department roles and mindsets as automation becomes more pervasive. And thirdly, they need to become agents of change.
