

Architectural Tools and Processes Training

Create a strong foundation for the Architecture of your organization

Deep-dive into the four big steps of the Architecture process during this training: visualization, strategy definition, strategy execution and delivery preparation. Learn and use techniques and best practices for each of these steps.

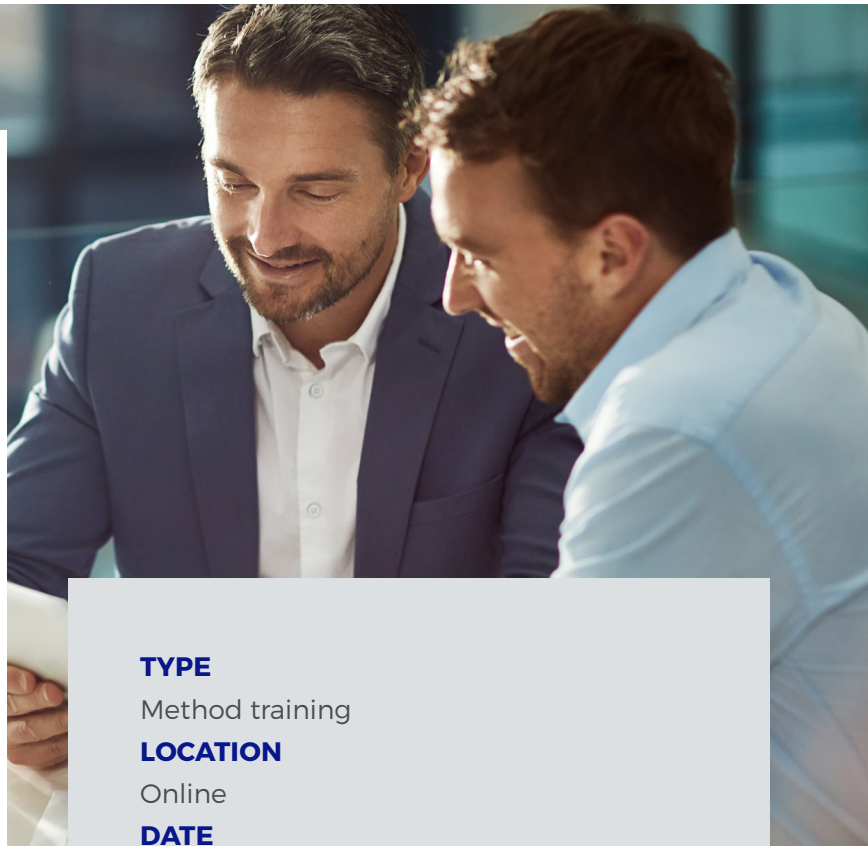

Reflect on how to interact with key stakeholders during this process, and how the associated tools and modeling approach can be embedded in your organization.

Get familiar with modeling in ArchiMate. Extend your toolbox by using this application on cases where Architectural modeling can help to address the complexity of them.

Training days

Every training day starts at 9 AM and ends at 1 PM (Brussels Time). For this training, the self-paced learning period starts two weeks earlier on August 24th. The training days for this course are:

- Wednesday, September 7th
- Wednesday, September 14th
