XPLUS

Technology and Infrastructure Architecture Training

Learn to apply key technology architecture techniques

Hands-on experience with architectural drivers and the framing of non-functional requirements to constrain architectural solutions. Gain deeper insights into key techniques and models about the technology landscape, technology life cycle management, and deployment views. Learn how to leverage architectural effort across initiatives through reference architecture, including functional patterns.

Training days

Every training day starts at 9 AM and ends at 1 PM (Brussels Time). For this training, the self-paced learning period starts two weeks earlier on August 25th. The training days for this course are:

- Friday, September 8th
